

FOR IMMEDIATE RELEASE

**BreatheAmerica Announces a Clinical Research Study for Chronic  
Obstructive Pulmonary Disease (COPD)**

*Clinical research study enrolling now*

Shreveport, LA – (BUSINESS WIRE) – BreatheAmerica announces recruitment for a clinical research study of individuals with chronic obstructive pulmonary disease (COPD), including chronic bronchitis and emphysema.

This clinical research study will involve participants with COPD across clinical research study centers in the United States and Canada. Clinical research study participants must be current or former smokers 40 years of age or older with a diagnosis of moderate to very severe COPD. The purpose of this clinical research study is to evaluate the long-term heart-related safety and effects on the worsening of COPD symptoms of an investigational inhaled drug for COPD.

For more information about the clinical research study, please call **318-393-6596** or visit **[www.breatheamerica.com](http://www.breatheamerica.com)**. Volunteers will participate in a pre-screening questionnaire to determine their potential eligibility in the clinical research study.

**About BreatheAmerica:**

BreatheAmerica operates airway disease centers for patients of all ages that suffer from asthma, sinusitis, rhinitis, COPD and other respiratory disease, as well as their allergic and non-allergic causes. The clinical model is based upon principles developed over ten years in a leading university medical center setting. BreatheAmerica employs a provider-led chronic disease management program which is uniquely disease and patient-centric, by using a multi-specialty, clinically integrated approach. BreatheAmerica Centers are located in Albuquerque, NM; El Paso, TX; and Shreveport, LA.
